

Speculative Gardening

Sebastian Gschanes x BDW 2023

FUZZY EARTH

"If the planet is a garden, we are all gardeners." - Gilles Clément

Icons of the Anthropocene

2000 Paul J. Crutzen

Sand Mafia at Ganges

More-than-human world

1996 David Abram

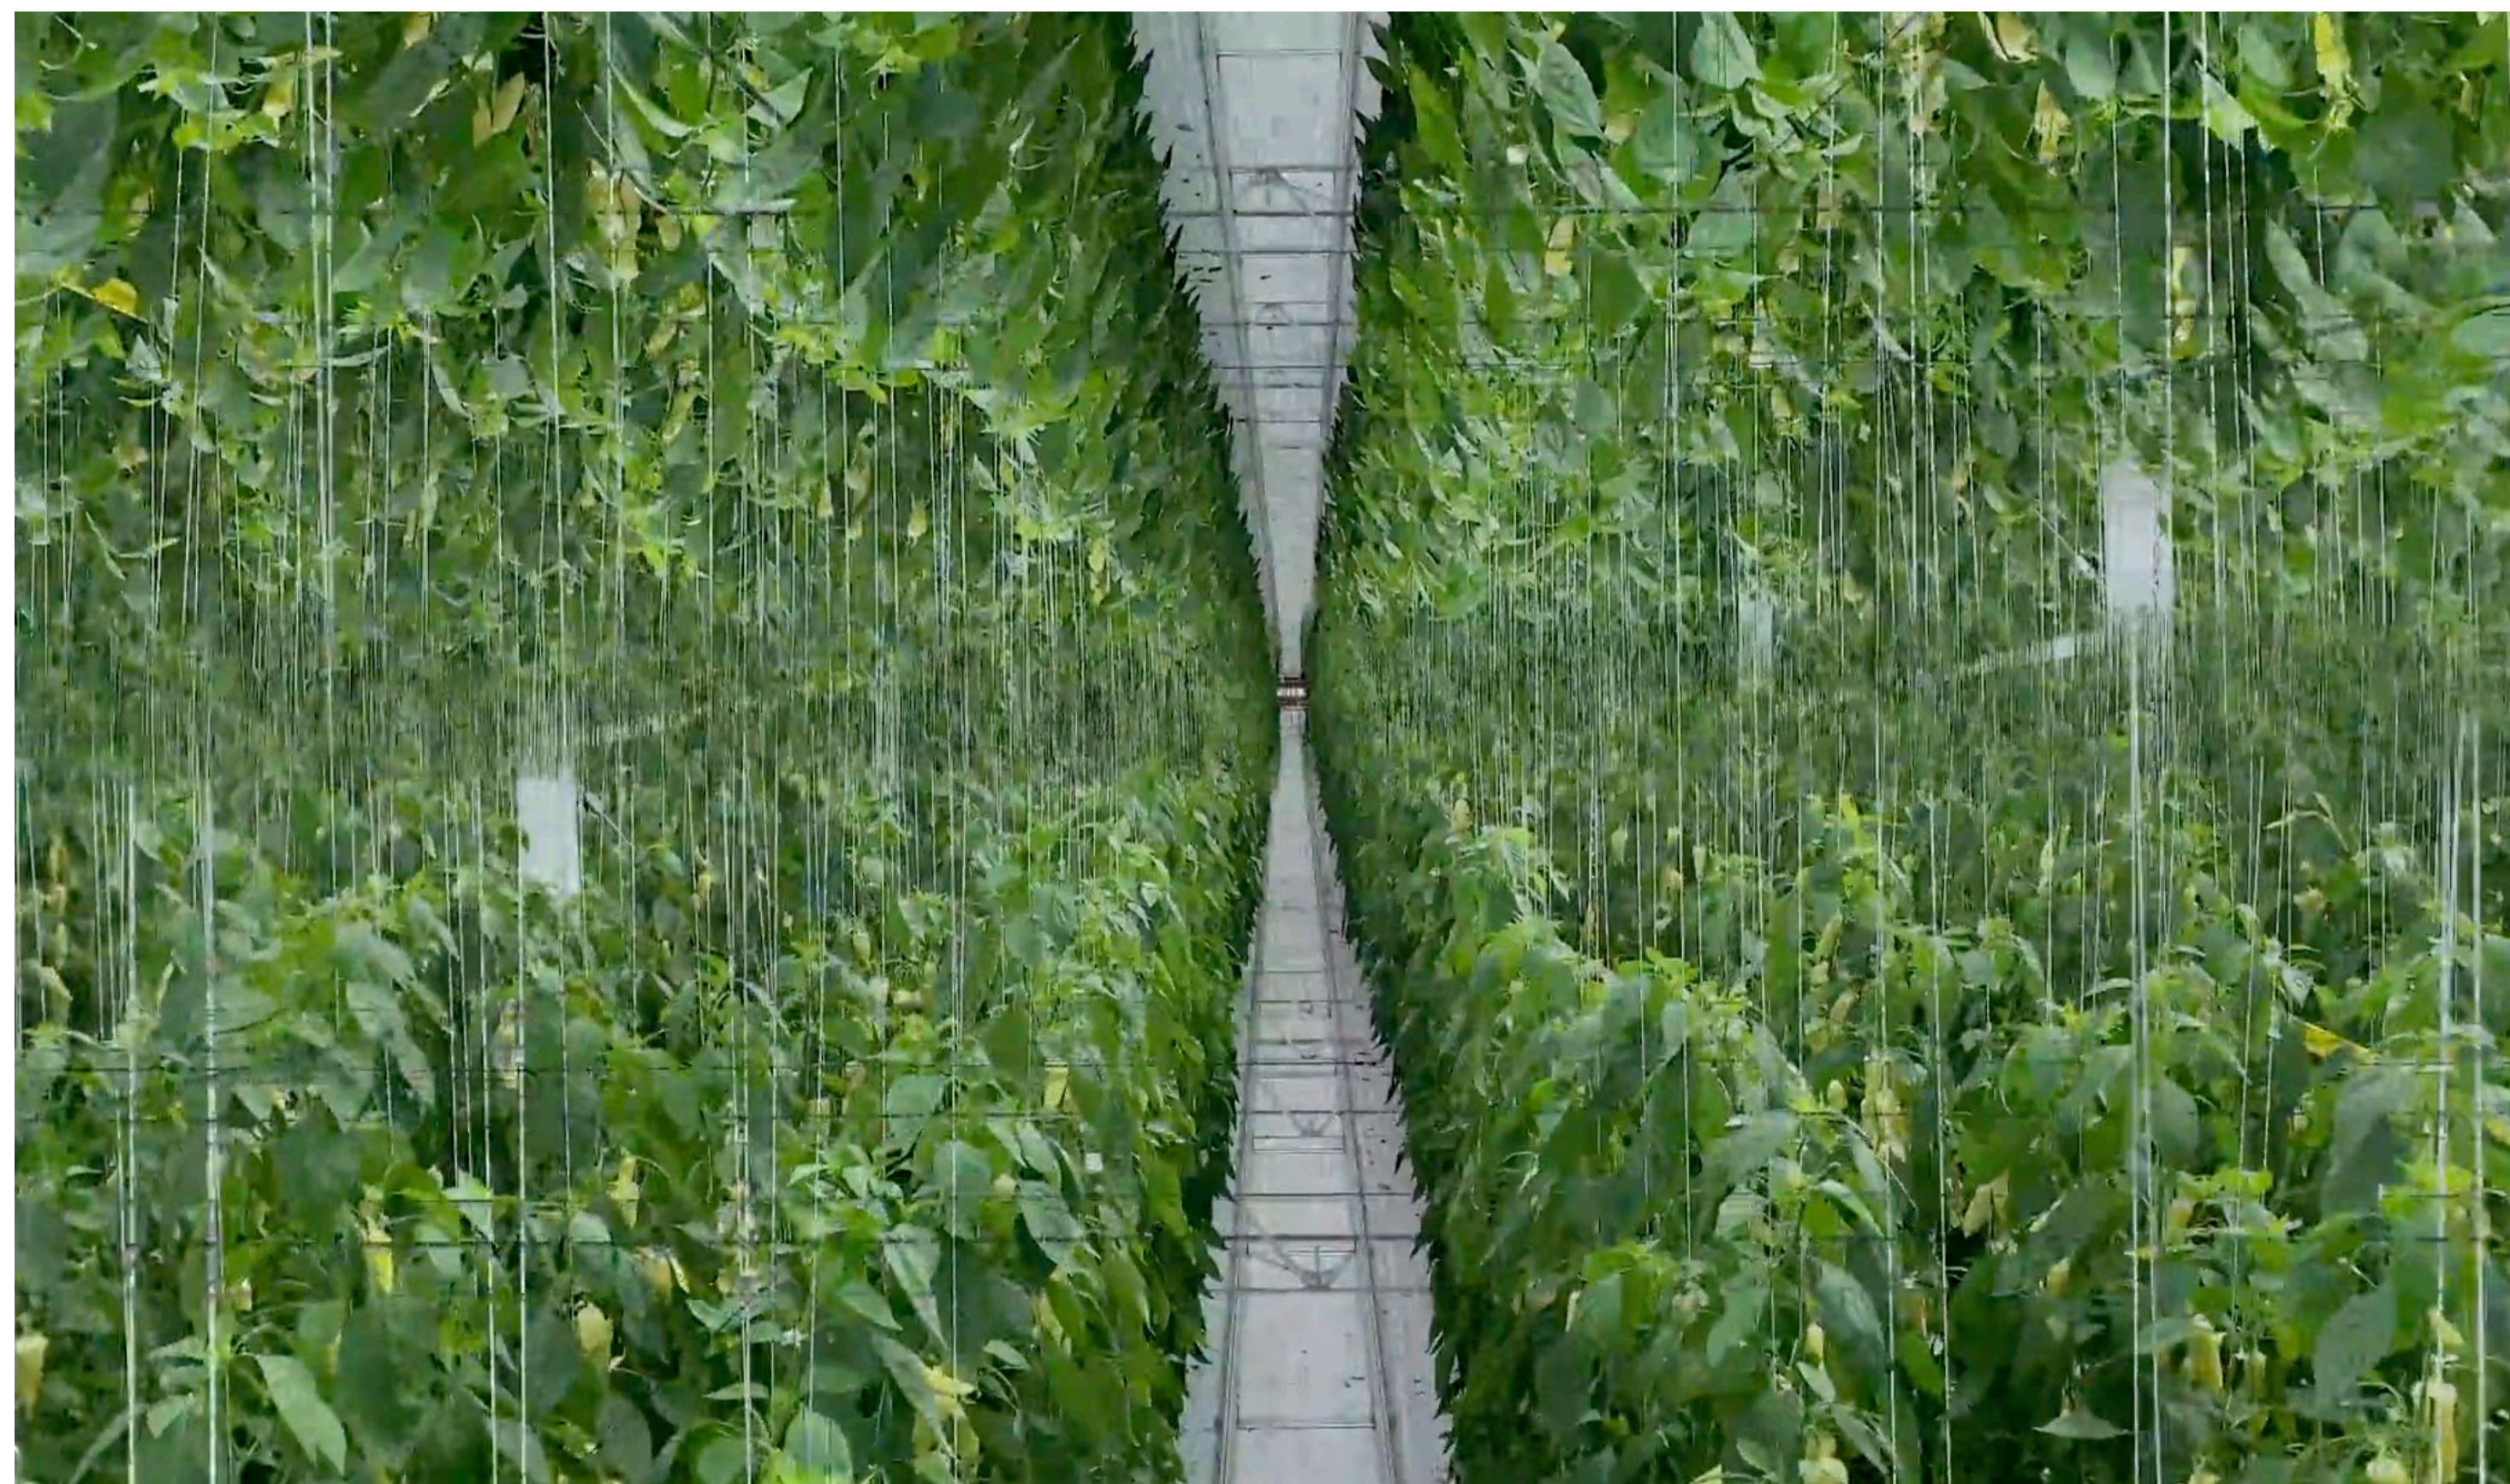

Acts of care
(Derek Jarman's Prospect Cottage)

Fuzzy Earth builds alternative worlds and reveals unseen layers of entanglements across species in the era of climate crises to inspire a more inclusive and resilient future.

Alliances

When two individual lichen's thalluses reach each other, they might merge. They blur the boundaries between one and another. They see each other as self. Their ecosystem, their physical body, their colours fade into one unified organism hiding the fact they ever existed otherwise. They continue to grow outwards in a new altered geometry to create new links, new connections with their neighbour companions until there is no more me, you and they, only us.
